About FlyIT Kft.

We are a software development and consulting company operating with a new approach, where we create affordable and fast solutions for our partners.

How do we help our partners?

We are developing innovative business applications for companies which makes the everyday work easier. The PowerApps solutions created by us are proved to be effective in corporate environment and used more than 16 countries daily.

We are automating business processes which are improving efficiency, reduces human mistakes and saving resources, time, and money for companies. Just take care of your strategic and creative processes, we can automatize everything else!

We are one of the most experienced Microsoft365 and PowerPlatform teams in Europe, so you will be in the best hands with us when it comes to digitalization. As a certified and official Microsoft partner you can rely on us in developer and user trainings, IT consulting and reliable support!

FlyIT can help your business enter the AI-based business world

Here are a few examples of AI tools and solutions we can provide for enterprise-grade implementation

Microsoft 365 Copilot

An outstanding artificial intelligence assistant that supports the user across a wide range of Microsoft 365 services.

Bing Chat Enterprise

AI-powered chat for work

Bing Chat Enterprise (Copilot)

User and business data is protected and does not leak outside the organisation. You can be sure that they are not used to train models.

PowerAutomate Copilot

Build business processes and automations with AI without IT resources, just from sentences!

PowerAutomate AI HUB

Adding intelligence to automated processes such as: invoice processing, document management, handling incoming requests, highlighting key information, etc...

Microsoft Copilot studio (Power Virtual Agents)

It's easy to have your own AI-based assistant for your business, whether it's an internal knowledge base or external customer support.

PowerAutomate Process Mining

Optimise your processes and easily identify areas for improvement with artificial intelligence!

Azure OpenAI Services

With OpenAI GPT-4, GPT-3, Codex, DALL-E and Whisper models, OpenAI offers customers advanced language AI with Azure security and enterprise-grade quality for custom development.

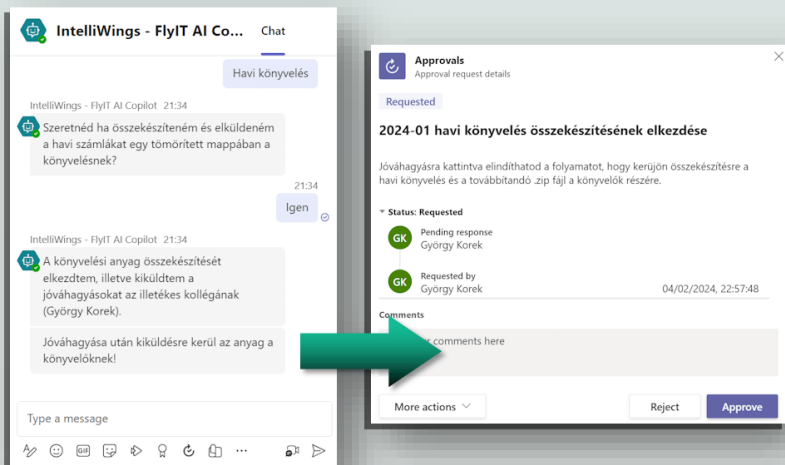

Microsoft Fabric

Transform the way everyone accesses, manages and uses data with a single artificial intelligence platform.

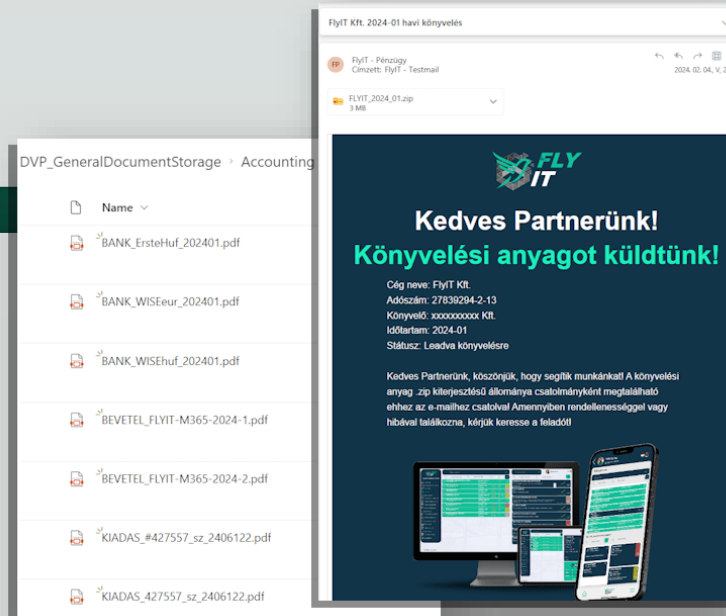

An AI-driven automation we developed (example)

Custom AI assistant available from Microsoft Teams

Automated invoice collection and transmission to accountants

Our AI-based assistant, FlyIT Copilot, available in Microsoft Teams, proactively offers to set up a monthly invoicing process when you ask about accounting deadlines. If the user requests this service, Copilot opens an approval task for the set approver.

If the approver accepts the task, Copilot will start collecting the saved invoices for the previous month. It then creates a compressed folder and prefixes the invoices with prefixes indicating the type of document (expense, revenue, bank). Finally, Copilot sends the document and the associated mail to the configured accounting partner. This process is automated, making the monthly invoicing process much easier.
