

You imagine, we make it fly!

FlyIT Kft. | VAT registration: HU27839294 | info@flyit.hu | www.flyit.hu | +36308348772

About FlyIT Kft.

We are a software development and consulting company operating with a new approach, where we create affordable and fast solutions for our partners.

How do we help our partners?

We are developing innovative business applications for companies which makes the everyday work easier. The PowerApps solutions created by us are proved to be effective in corporate environment and used more than 16 countries daily.

We are automating business processes which are improving efficiency, reduces human mistakes and saving resources, time, and money for companies. Just take care of your strategic and creative processes, we can automatize everything else!

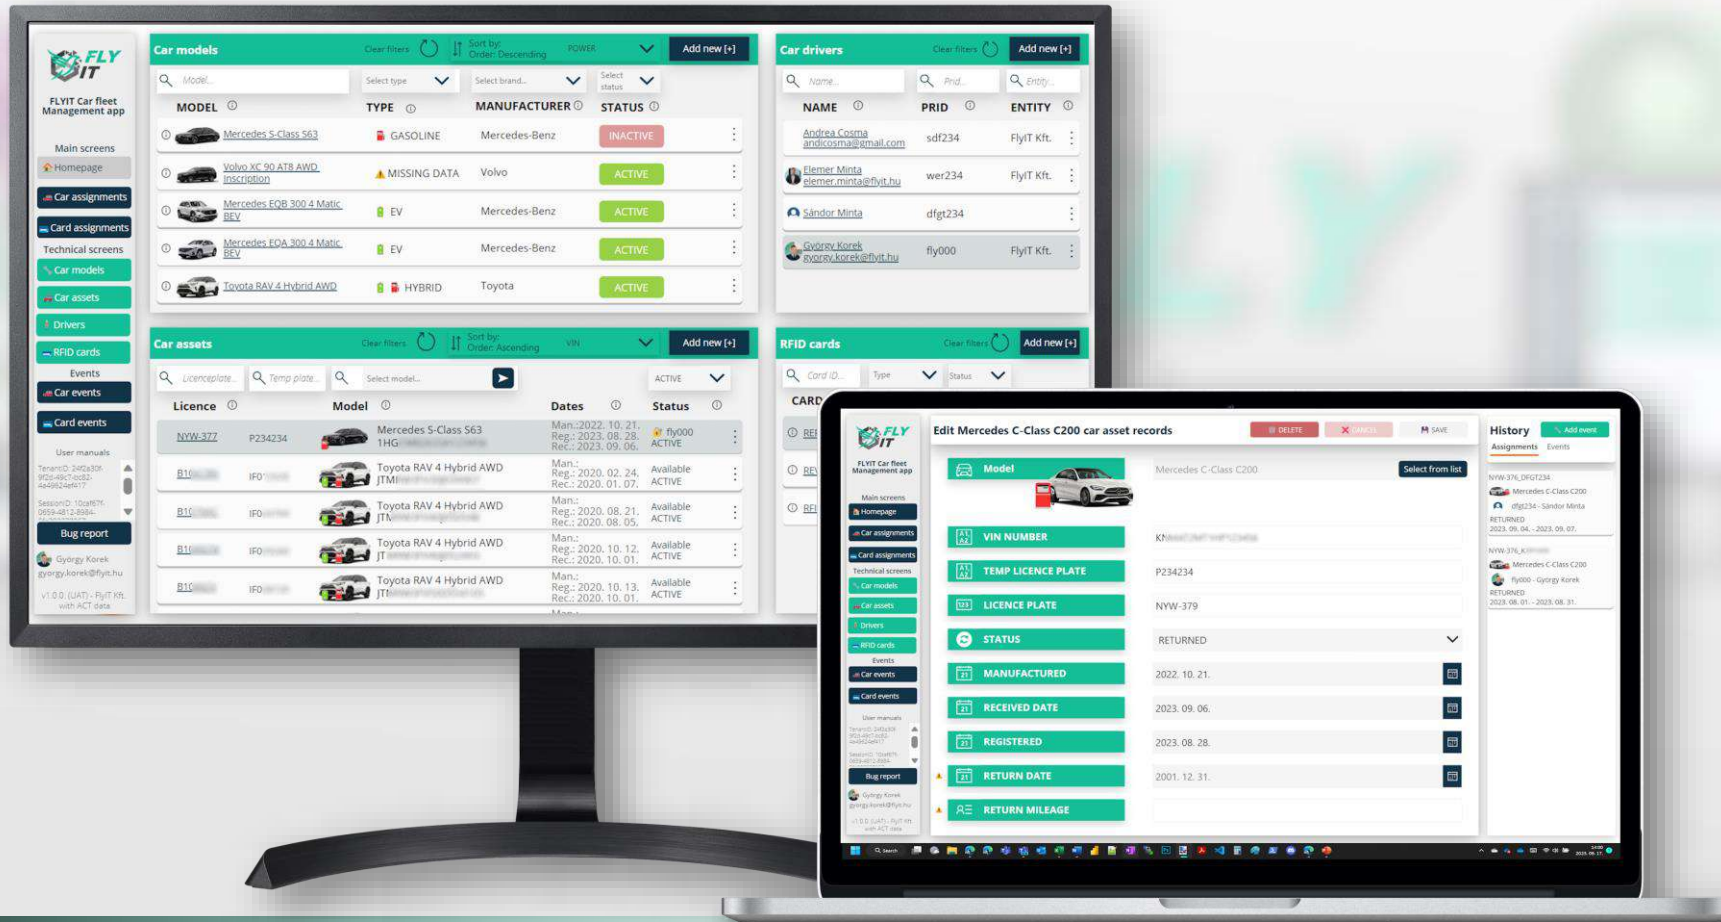

We are one of the most experienced Microsoft365 and PowerPlatform teams in Hungary, so you will be in the best hands with us when it comes to digitalization. As a certified and official Microsoft partner you can rely on us in developer and user trainings, IT consulting and reliable support!

↓ The next topic is FlyIT Car Fleet Management System ↓

FlyIT Car Fleet Management System

The system is designed to streamline and enhance the management of a fleet of vehicles, including car models, assets, drivers, RFID cards, and assignments.

How to import CSV? Guidelines

All CSVs can be generated by pressing a single button.

Import mileage csv

An interface where you can choose which mileage csv you want to load into the temporary table!

Start Mileage csv process

CSV loading into the TEMP table!

Want to empty the TEMP table before loading the csv?
YES: Clear the table
NO: The contents of the csv will be added to existing records.

YES

Which csv content do you want to load? Pick one!

Fleet Manager Full Details Report_20231102_124918.csv

[Do you want to upload a new file? Click here! \(click to open\)](#)

Start processing Close

Temporary mileage records

In this table you can see the mileage records after csv import and the errors that occur are highlighted separately, which you can modify and correct!

Help for administration
Welcome to the mileage report Recording and Editing page! This section allows you to manage and maintain a comprehensive record of all the drivers in your fleet. Accurate costcenter information is crucial for effective car fleet management, so let's get started.

Approve temporary mileage records

In this interface, you can approve the mileage records in the temporary table and they will be transferred to the final table. The system also highlights the number of incorrect records!

Example: selector field, from another table

e.g., Car Asset -> Model field

The screenshot displays the FLYIT Car fleet Management app interface. A modal window titled "Car models" is open, allowing users to select a car model. The modal includes a search bar, filter dropdowns for "Select type", "Select brand...", and "Select status", and an "Add new [+]" button. Below these is a table of car models with columns for Model, Type, Manufacturer, and Status. The table lists several models, including Volkswagen ID.5, Mercedes EQE, Volkswagen ID3, Mercedes S-Class S63, BMW i3, Toyota Supra MK5, and Mercedes C-Class C200. The modal also features a "Select" button and a "Close" button.

Car models

Model... Select type Select brand... Select status Add new [+]

MODEL	TYPE	MANUFACTURER	Status
Volkswagen ID.5	EV	Volkswagen	ACTIVE
Mercedes EQE	EV	Mercedes-Benz	ACTIVE
Volkswagen ID3	EV	Volkswagen	ACTIVE
Mercedes S-Class S63	BENZIN	Mercedes-Benz	ACTIVE
BMW i3	EV	BMW	ACTIVE
Toyota Supra MK5	BENZIN	Toyota	SUSPENDED
Mercedes C-Class C200	BENZIN	Mercedes-Benz	ACTIVE

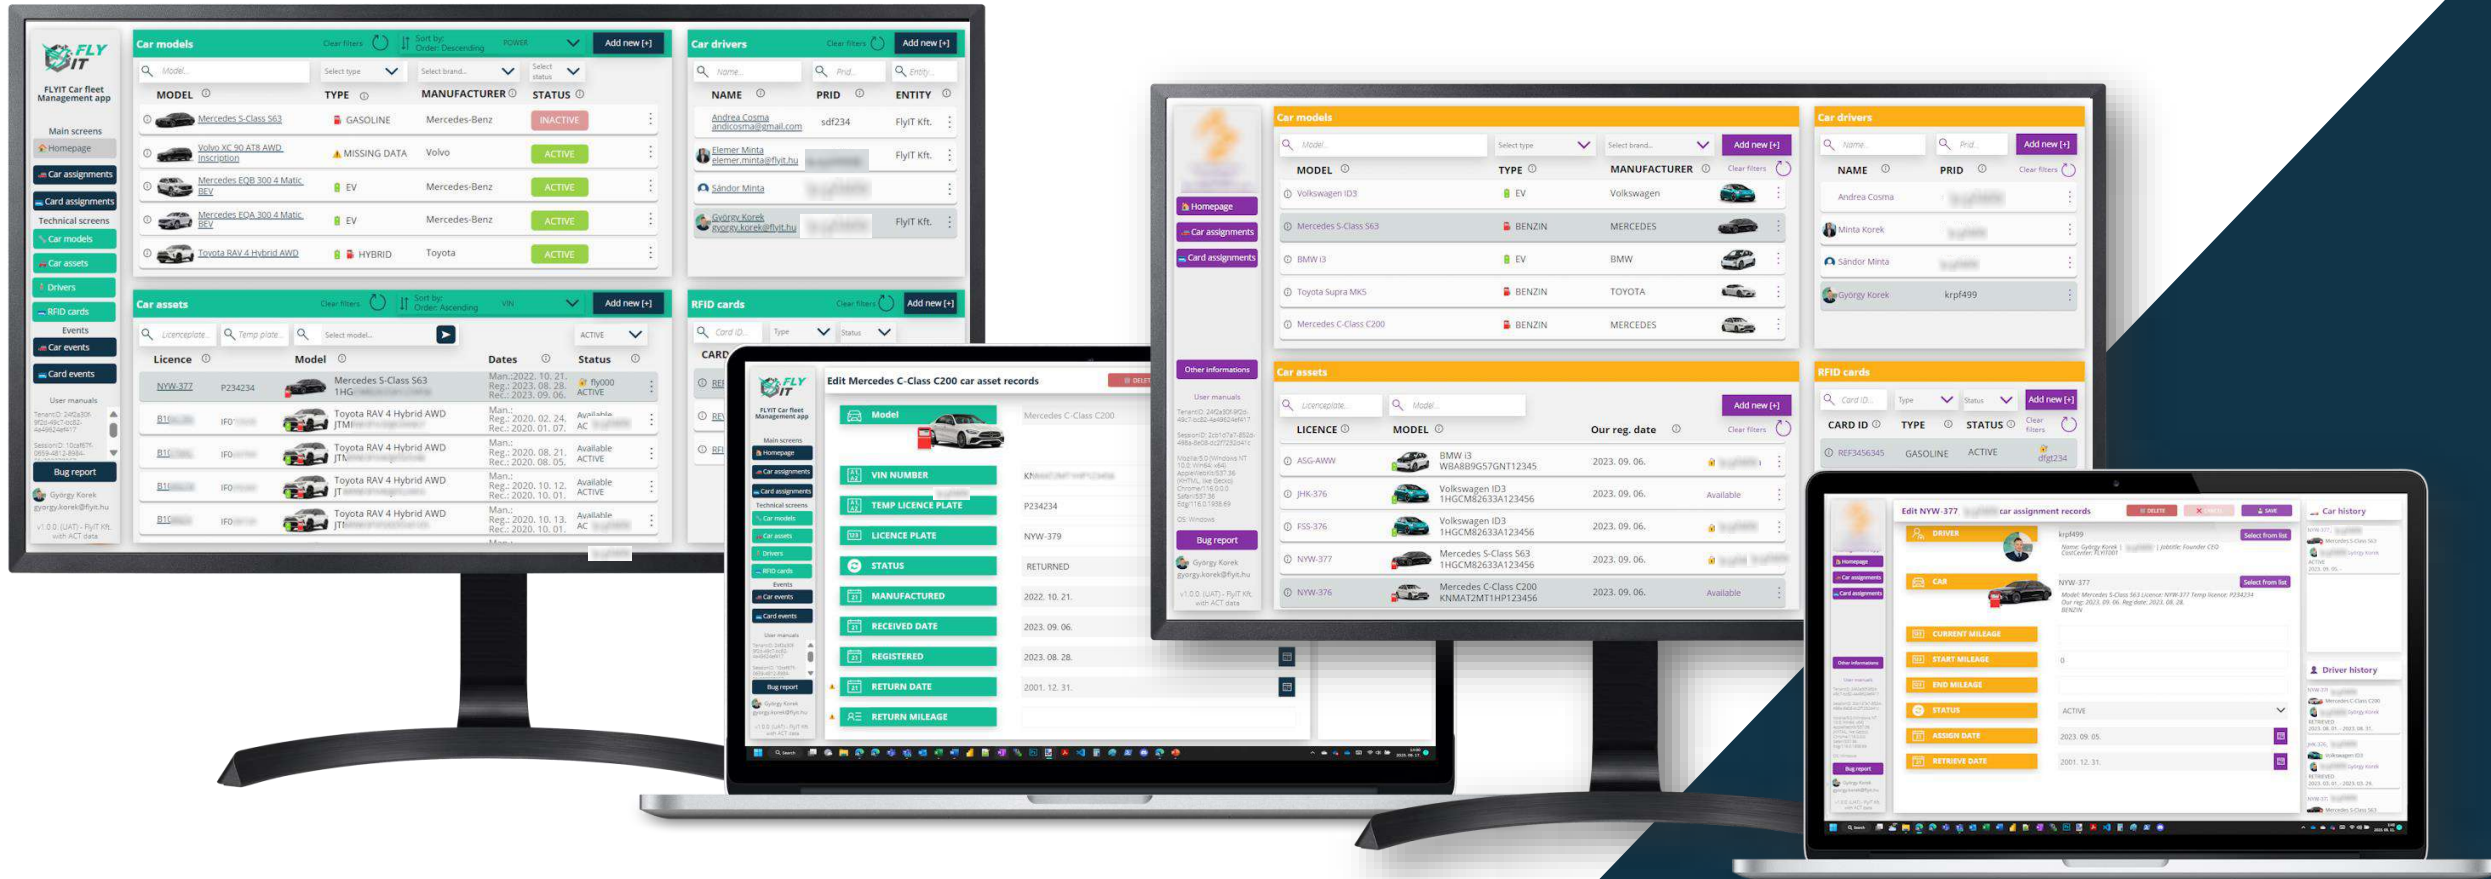

Select Close

Example: delete warning

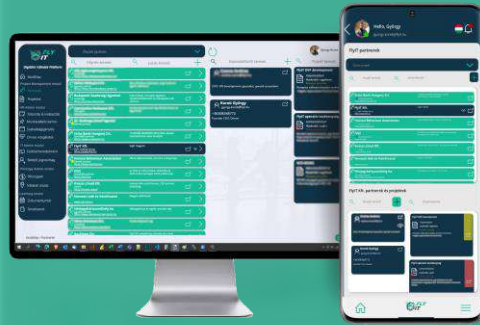

The screenshot displays the FLYIT Car fleet Management app interface. The main content area is titled "Edit Mercedes S-Class S63 car asset records" and features a "DELETE" button. A red warning banner at the top of the form reads "WARNING, DELETE ITEM... DO YOU WANT TO DELETE?". A modal dialog box is open in the center, asking "Do you want to delete the Mercedes S-Class S63 (NYW-377) car?". The dialog includes a warning icon and a detailed message: "In case of deletion, records linked to this element will lose the data for this element! If you do not want to delete it, set the status of the element (if possible for this element)! Are you sure you want to delete it?". The dialog has "Delete" and "Close" buttons. The background form shows fields for Model (Mercedes S-Class S63), VIN NUMBER, LICENCE PLATE, TEMP LICENCE, MANUFACTURE, REGISTERED, AZ REGISTERED, and MILEAGE. A "History" sidebar on the right shows a record for NYW-377_KRPF499, Mercedes S-Class S63, with user krp499 - György Korek and status ACTIVE.

FlyIT Car Fleet Management System

Customized to your company's design!

A few examples of the solutions developed by us:

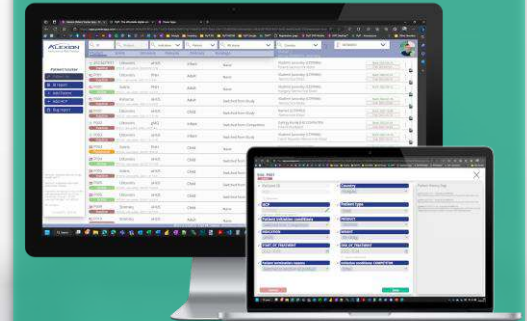

Digital Corporate Platform

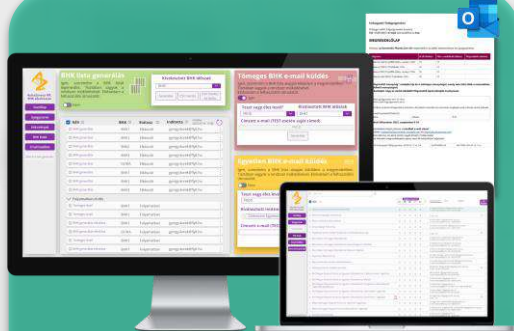

Digital Corporate Platform Mobile

DVP - Intrapp
Enterprise internal mobile app

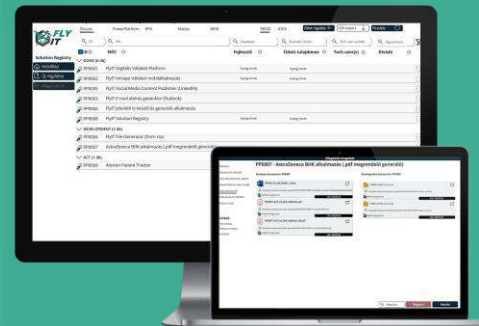

Patient tracker app in healthcare

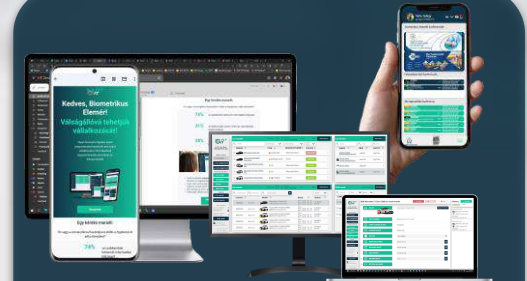

Order form builder application in pharma industry

Attendance sheet and signature management app in event management

Solution registry and repository
